

# Special Needs ——— ————— Plan Alliance

## SNP Alliance Spring Roundtable 2024

### Building SNP Infrastructure: Supporting Beneficiaries and New CMS Policy

SNP enrollees are becoming increasingly more complex and diverse. Needs include behavioral health, addiction medicine, and a growing number of duals with intellectual and developmental disabilities. At the same time, SNP must expand and build operational infrastructure to meet new CMS requirements. The SNP Alliance's Spring Meeting will be a working technical session focusing on strategies to address these emerging changes in the SNP operating environment. Key topics will include recruiting new types of behavioral health professionals, new SSBCI tracking and reporting requirements, new broker requirements, preliminary insights on integration "4 Pack" policy impacts, and MOC and HRA implications for provider training.

**THANK YOU** for attending the 2024 SNP Alliance Member's Only Spring Roundtable!

Thank you to all who joined us for our annual Spring Roundtable in Washington, DC on April 15th & 16th. Your presence and insights contributed immensely to the success of our event. The meeting was focused on how the SNP Alliance and our members are helping to shape the future in our advocacy work with congress, in our focus on improving gaps in measurement, and on strategies to further advance dual integration in a meaningful way.
